

What is the difference between HealthCare and IT sector total revenue on the First Year ?

As it appears for these histograms both are skewed-Right which means they have a mean higher than a median.

The mean is Healthcare is 20.3 billion while IT sector has 20.8 billion. Also, the median for HealthCare is 8 billion even IT has a median which is 8 billion. However, the standard deviation for HealthCare is 40.8 billion while IT has a standard deviation 41.9.

The difference is healthcare spend less than IT sectors even though the count for HealthCare is 1695 and IT is 1983. the range for both is close to each other which is 485 billion, which means that companies in IT sector cost much more than company in HealthCare.
